ROBINSON TUITION
LEARN WITH CONFIDENCE

Free maths help for your school

Two libraries, KS3 and GCSE, with a worksheet, an answers sheet and worked solutions for every topic, plus online marking. A-level is coming soon. Free for every pupil and teacher. Nothing to pay, and accounts are optional.

robinsontuition.com/how-it-works-teachers

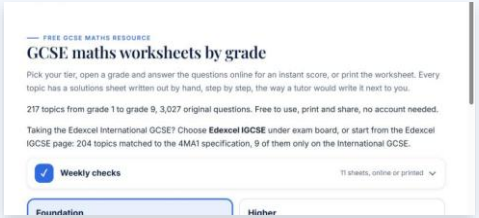

KS3 and GCSE now, A-level coming soon

KS3: Years 7, 8 and 9

68 topics in the order a school scheme of learning teaches them. 843 original questions.

robinsontuition.com/ks3-maths-topics

GCSE: grades 1 to 9

220 topics, Foundation and Higher, for Edexcel, AQA and OCR. 3,057 original questions. A separate Edexcel IGCSE list matches the 4MA1 specification.

What every topic page gives

1. **Worksheet PDF**
   One or two sides. Print it, photocopy it, or set it on screen.

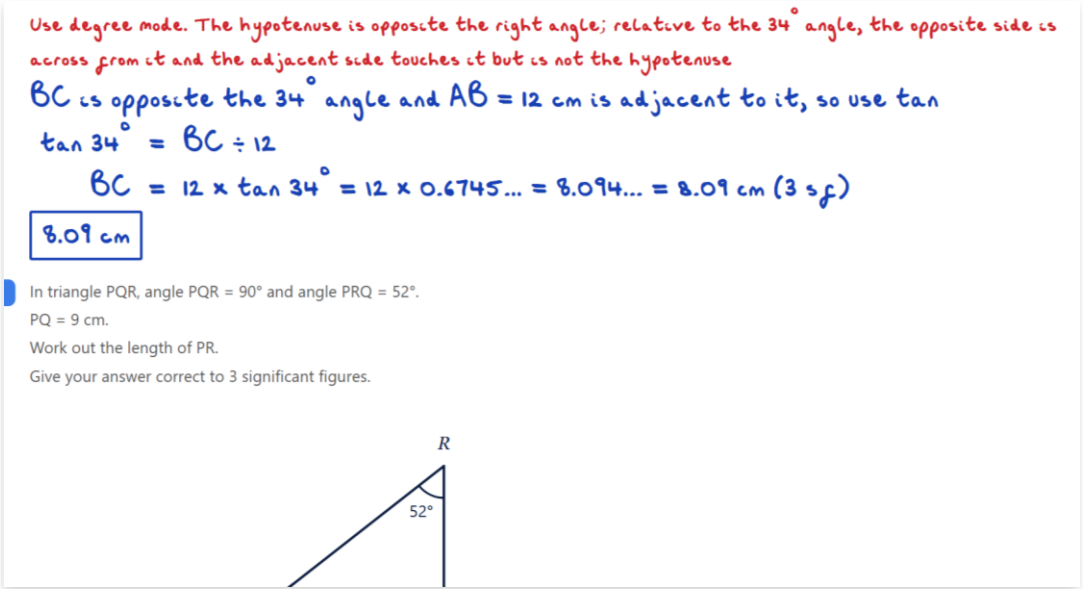

2. **Answers sheet**
   One page, so pupils can mark their own in a few minutes.

3. **Worked solutions**
   Every step of the method written out, line by line.

4. **Answer online**
   Type the answers on the page for an instant mark and a score.

robinsontuition.com/how-it-works-teachers

Every step, worked out

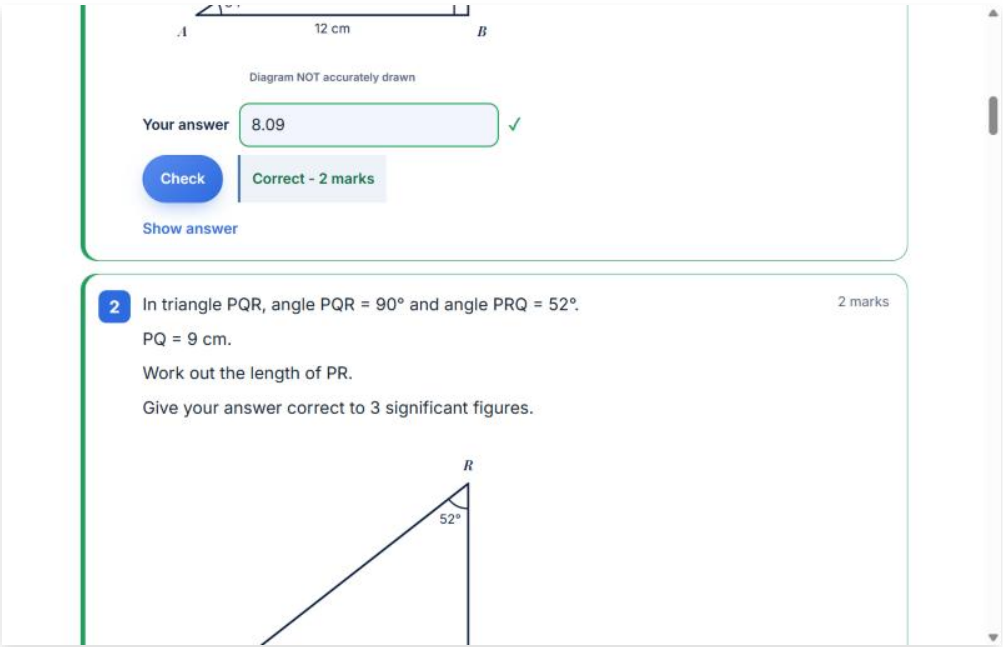

Every step of the method, line by line.

Blue is the working. Red is the method and the operation on each line.

The answer is boxed, the way the examiner wants to see it.

A pupil who got it wrong can find the line where their working went different.

Online marking with an instant score

Type an answer, press Check
Each question is marked on the spot, with the marks it earned.

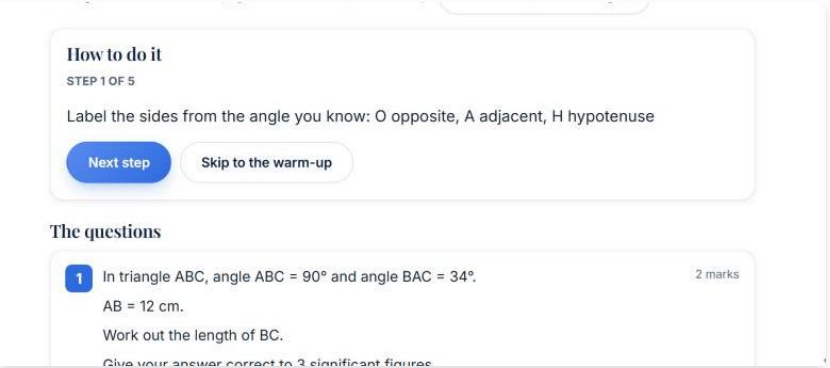

A score at the end
Questions, marks and a percentage, with a retry for the ones that went wrong.

Best score saved
The best score shows on the library page and on the RAG sheet. 80% or more ticks the topic off.

Paper still works
A pupil can print the sheet instead and mark it with the answers.

robinsontuition.com/how-it-works-teachers

Learn it first, then the next topic

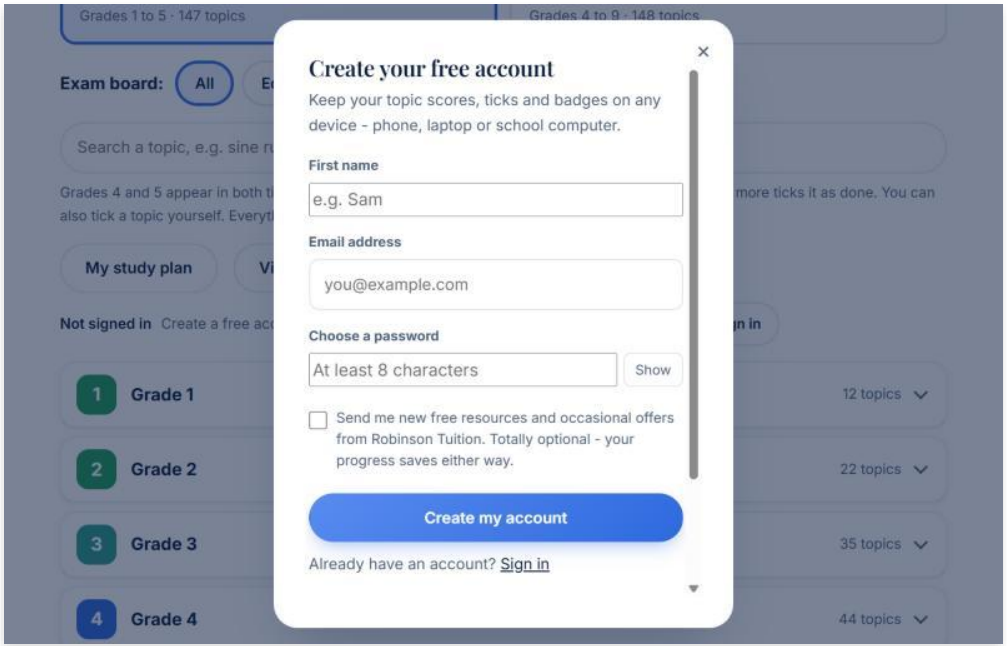

New to the topic? Learn it first walks through the method step by step with a worked example, then two warm-up questions with hints. Nothing counts until the pupil starts the sheet.

After every score the page suggests what to do next: retry the ones that went wrong, or move on to the next topic in the grade.

robinsontuition.com/how-it-works-teachers

Scores that follow the pupil

1. **Free account, optional**
   First name, email and a password. Nothing else is asked for.

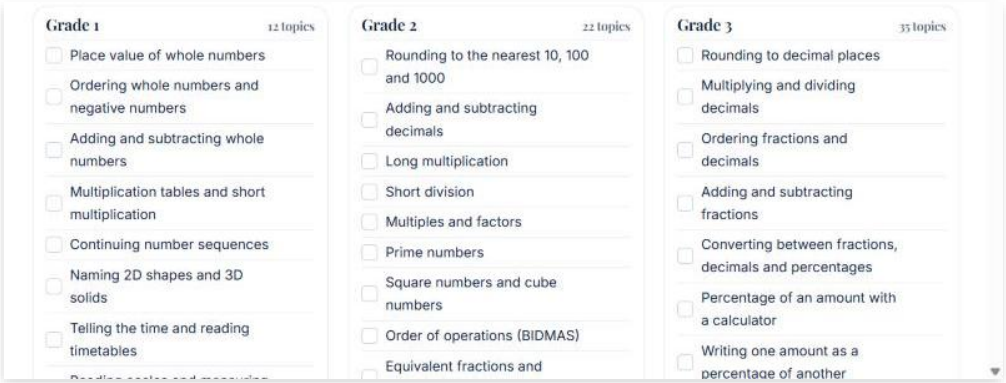

2. **Any device**
   Scores, ticks and badges follow the pupil between phone, laptop and school computer.

3. **Works without one too**
   With no account, everything is saved in that browser only.

4. **Free classes for teachers**
   Make a class, share its six-character code, and see the best score per topic for each pupil.

robinsontuition.com/how-it-works-teachers

The RAG sheet fills in by itself

1. **Every topic, coloured by best score**
   Green 80% and over, amber 50 to 79, red under 50, white not tried yet.

2. **Foundation or Higher**
   In grade order, so a pupil can see where the gaps are.

3. **Print or save as PDF**
   One sheet for a revision folder, a parents evening or an intervention group.

4. **KS3 too**
   The KS3 library has its own RAG sheet, by year.

Weekly check sheets

One sheet per grade

11 sheets: grades 1 to 9, plus a Foundation crossover (grades 4 and 5) and a Higher crossover (grades 6 and 7).

20 mixed questions

About 50 marks from across the grade, with an answers sheet and worked solutions.

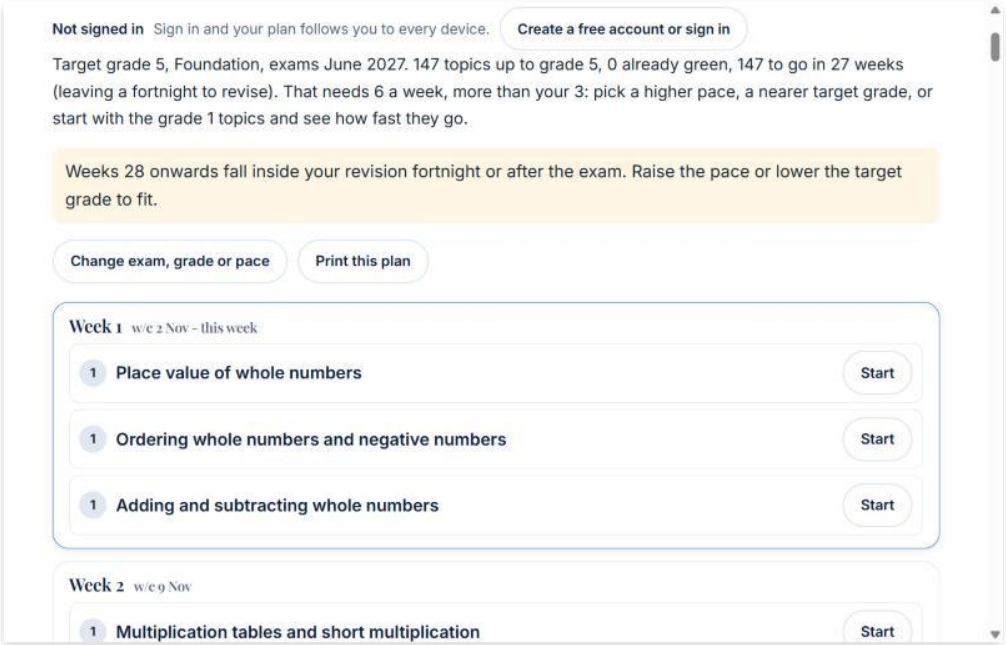

Online or on paper

Answer online for an instant score, or set one a week on paper and mark it in ten minutes.

Best score kept

The best score shows on the library page and on the RAG sheet.

A study plan up to the exam

1. **Exam month and target grade**
   Plus tier, exam board and how many topics a week.

2. **Topics a week, in grade order**
   Every topic the pupil still needs, spread up to a fortnight before the exam.

3. **Updates itself**
   A topic is ticked off at 80% or more, or when the pupil ticks it. Change the plan any time.

4. **Print it**
   One sheet for the pupil, the parent or the form tutor.

How a department can use it

1

Print and photocopy

Free for classroom use: print, photocopy and share with your pupils. Not for resale or re-hosting.

2

Set as homework

Set the topic you have just taught. Pupils answer online for an instant score, or on paper. With a free class you can set a mixed set as homework and see every result.

3

Download the lot

The schools page has a zip of every sheet by GCSE grade and KS3 year, so a department can keep a copy on its own system.

4

Intervention groups

Foundation and Higher lists, the RAG sheet and the weekly checks give a grade 3 to 4 group and a grade 6 to 7 group each a list that fits.

Everything is on the schools page
